DETAILED ACTION

Applicant's election of the invention of Group V, claims 24-28 in the reply filed on 8/10/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/10/06.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 24-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Kopolka et al. '803.

The patent to Kopolka et al. discloses a user interface module 106 as shown in figure 2 that can access a vehicle server 202 via wireless communication and through application specific module 312 in Figure 3 and select a diagnostic instrument in figure 4 and process the selected application as done in figure 5. Figure 5 identifies the diagnostic information as well as broadcasts it.

Claim 28 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
